

ABDULLAH KAMRAN

Full Stack Developer

United Arab Emirates | +971 55 963 8177 | abdullahkamran823@gmail.com

Portfolio: abdullahexe.online | GitHub: github.com/4bdulllahh | LinkedIn: linkedin.com/in/abzoola

PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science graduate (BSc, Bath Spa University, 2026; Honors List) with 3+ years of building and shipping production software for real clients. Delivers projects end to end as sole developer: JavaScript, Node.js and Express backends on MongoDB and MySQL; React, Vue 3 and Next.js frontends styled with Tailwind CSS; Python desktop applications with PyQt6 and asyncio; and native Android apps in Kotlin. Portfolio of 13 shipped projects spanning e-commerce, real estate CRM, email-deliverability tooling, machine learning, computer vision and games. Came to engineering from B2B sales, which means every build starts with the business problem, not the framework. Available for full-time roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, Kotlin, C#, C++, SQL, HTML5, CSS3

Frontend: React, Next.js, Vue 3, Tailwind CSS, Three.js, WebGL, GSAP, Vite, Responsive Design, UI/UX

Backend & APIs: Node.js, Express, REST API Design, SMTP/IMAP, Python asyncio, Multi-threading

Databases: MongoDB, MySQL, SQLite, Schema Design

AI & Data: Scikit-learn, Pandas, Matplotlib, OpenCV, Google Agent Development Kit (ADK), LLM Prompting & Agent Workflows

Mobile & Desktop: Android SDK, Android Studio, Gradle, Material UI, PyQt6, Tkinter, PyInstaller

Tools & Deployment: Git, GitHub, Vercel, Figma, Adobe Creative Suite, SEO, SPF / DKIM / DMARC

Other: Unity, Arduino, CAD & 3D Printing, Twine

PROFESSIONAL EXPERIENCE

Full Stack Developer

Dec 2025 - Present

Self-Employed (Freelance) | United Arab Emirates | Remote

- Deliver client projects end to end as sole developer: requirements, Figma design, frontend, backend, deployment on Vercel, domains, performance tuning and post-launch maintenance.
- **Dekor (furniture e-commerce):** built a Node.js/Express REST API for catalogue and orders, a MongoDB product and order store, an integrated payment wall, Three.js product visualisation and a Tailwind CSS interface.
- **Hannah Morgan Homes (UAE real estate):** built a Vue 3 + Vite single-page app with an AI assistant that qualifies buyers by budget, emirate and property type, plus a private lead-tracking CRM and an analytics dashboard showing enquiry sources.
- **Prime Real Estate (property marketing):** built a MySQL-backed listings database, a lead-capture flow, and GSAP / Three.js scroll animation to lift engagement on listings.
- Translate non-technical client briefs into scoped, prioritised features, building the revenue-critical path first and iterating from real user behaviour after launch.

Web Developer

Jun 2023 - Nov 2025

Freelance | United Arab Emirates

- Sourced own clients and delivered responsive websites for small businesses with no prior web presence, owning copy, design, build, domain, deployment and follow-up support.
- Launched the Al Habibi Bakery website (HTML5, CSS3, JavaScript, WebGL) as first client, which seeded a referral-driven lead pipeline.
- Built scoping and quoting discipline: declined out-of-scope work to protect delivery quality and client relationships.

Sales Manager

Jun 2022 - Present

Uniformers | Sharjah, United Arab Emirates

- Own the full B2B sales cycle - prospecting, pitching, negotiating and closing uniform and workwear contracts - progressing from sales executive to Sales Manager.
- Taught myself HTML, CSS and JavaScript on the job, then designed and built the company's bilingual (English / Arabic) website with product categories, size guide, request-a-quote flow and SEO.
- **LeadsVeri:** built a Python asyncio desktop app that concurrently verifies emails and websites in Excel / CSV lead lists, with rate-limit-aware scan modes; shipped as a standalone Windows executable via PyInstaller, replacing manual list cleaning.
- Built HomingPigeon (see Projects) to make the team's cold outreach deliverable and compliant.

KEY PROJECTS

HomingPigeon | *Python, PyQt6, SQLite, SMTP/IMAP, DNS*

github.com/4bdullah/HomingPigeon

- Cross-platform desktop app for safe cold email: validates SPF, DKIM and DMARC before sending, then ramps volume from ~20/day with randomised delays and office-hours, holiday-aware scheduling.
- Pre-send spam scoring, contact validation on import, IMAP bounce detection, List-Unsubscribe headers and automatic halt on failure spikes; multi-threaded, with credentials encrypted via the OS keystore. Public beta and most-starred repository.

Face-Tracking Laser Turret | *Python, OpenCV, Arduino, C++, 3D Printing*

github.com/4bdullah/Face-Tracking-Laser

- Real-time OpenCV face detection converted to servo angles and streamed over serial to Arduino firmware driving a 3D-printed two-axis turret; designed the CAD, firmware, vision pipeline and wiring.

Stroke Prediction Model | *Python, Pandas, Scikit-learn, Matplotlib*

Kaggle: [abood186](#)

- Trained a RandomForestClassifier on an imbalanced clinical dataset, with data cleaning, feature engineering, class-imbalance handling and evaluation beyond raw accuracy; published as a public Kaggle notebook.

Android Apps: Trivia & SuperCar Wiki | *Kotlin, Java, Android SDK, REST API*

github.com/CodeLab-II

- Native Android apps: a Kotlin client consuming a live trivia REST API with selectable difficulty, loading and error states and configuration-change handling; and a Material UI wiki of supercar manufacturers.

Games: Dragons & Knights, Hallways | *Unity, C#, Twine / Harlowe*

a6dullah.itch.io

- Built and shipped a complete Unity game solo to itch.io (C# gameplay, physics, animation, level design), and a branching Twine horror game with multiple endings.

EDUCATION

BSc Computer Science | Honors List

2023 - 2026

Bath Spa University | United Arab Emirates

- Coursework: Algorithms, Data Structures, Databases, Machine Learning, Software Engineering, Mobile Development.

High School Diploma | General Science

Graduated 2022

The English Private School | United Arab Emirates

CERTIFICATIONS & ACHIEVEMENTS

- Build Intelligent Agents with Google Agent Development Kit - Google Developer Groups on Campus, Bath Spa University UAE (Nov 2025)
- Dream vs Reality: AI Battle - applied AI team competition, GDGoC Bath Spa University RAK (Feb 2026)
- Node.js Essential Training - LinkedIn Learning (Jan 2026)
- Designing RESTful APIs - LinkedIn Learning (Jan 2026)
- Python Intermediate - Sololearn, Credential CC-PFV7WMC1 (Dec 2024)
- Python Tkinter: Desktop GUI Development - Great Learning Academy (Dec 2024)
- Introduction to JavaScript - Sololearn, Credential CC-T9DT8AWN (Apr 2024)
